

SUSTAINABILITY STATEMENT

About This Report

Pantech Group is wholly committed to providing relevant disclosures on how operational activities impact stakeholders. Conducting business in a sustainable and ethical manner is cardinal in our pursuit of being an international leader in the provision of total solutions for gas and fluid transmission system.

This Sustainability Report presents qualitative and quantitative information regarding the material topics identified through our materiality assessment process. These topics represent Pantech Group’s most significant impacts on the economy, environment, and people.

Due care was exercised in preparing this report to reflect our sustainability efforts in a true and balanced manner. It illustrates our approach, principles, initiatives, performance, and commitment as well as our contributions towards the United Nations Sustainable Development Goals (UN SDGs).

Echoing our strategic objectives, Pantech Group’s sustainability initiatives focus on preserving and utilising the capitals towards achieving our vision. Our sustainability initiatives are classified into three (3) main operational pillars:

- Sustainable Business Growth**

Pantech Group is committed to creating long-term value for our stakeholders. This is done through careful utilisation of capitals guided by the monitoring and assessment of risk and opportunities. We practise continuous learning and improvement with relevant trainings to keep us agile and adaptable to the dynamic business environment. We supply an extensive range of pipes, valves, and fittings (PVF) that meet strict customer requirements through prudent investment in new facilities and upgrades to ensure efficiency of our operations.

- Environmental Protection**

We play our part towards transitioning to a low-carbon economy by minimising our impact towards and preserving natural capital. The Group employs proper waste disposal and management, has control systems and equipment installed, and harness renewable energy sources as well as allocate resources efficiently to our best capability.

- Workplace Management**

Maintaining a safe and conducive working environment is vital for Pantech Group. We continuously strive to maintain a safe workplace, nurture and invest in talent, and champion inclusion and equality to foster employee wellbeing.

Pantech Group contributes to 9 out of 17 UN SDGs as mapped in the chart.

Sustainability Statement (cont'd)

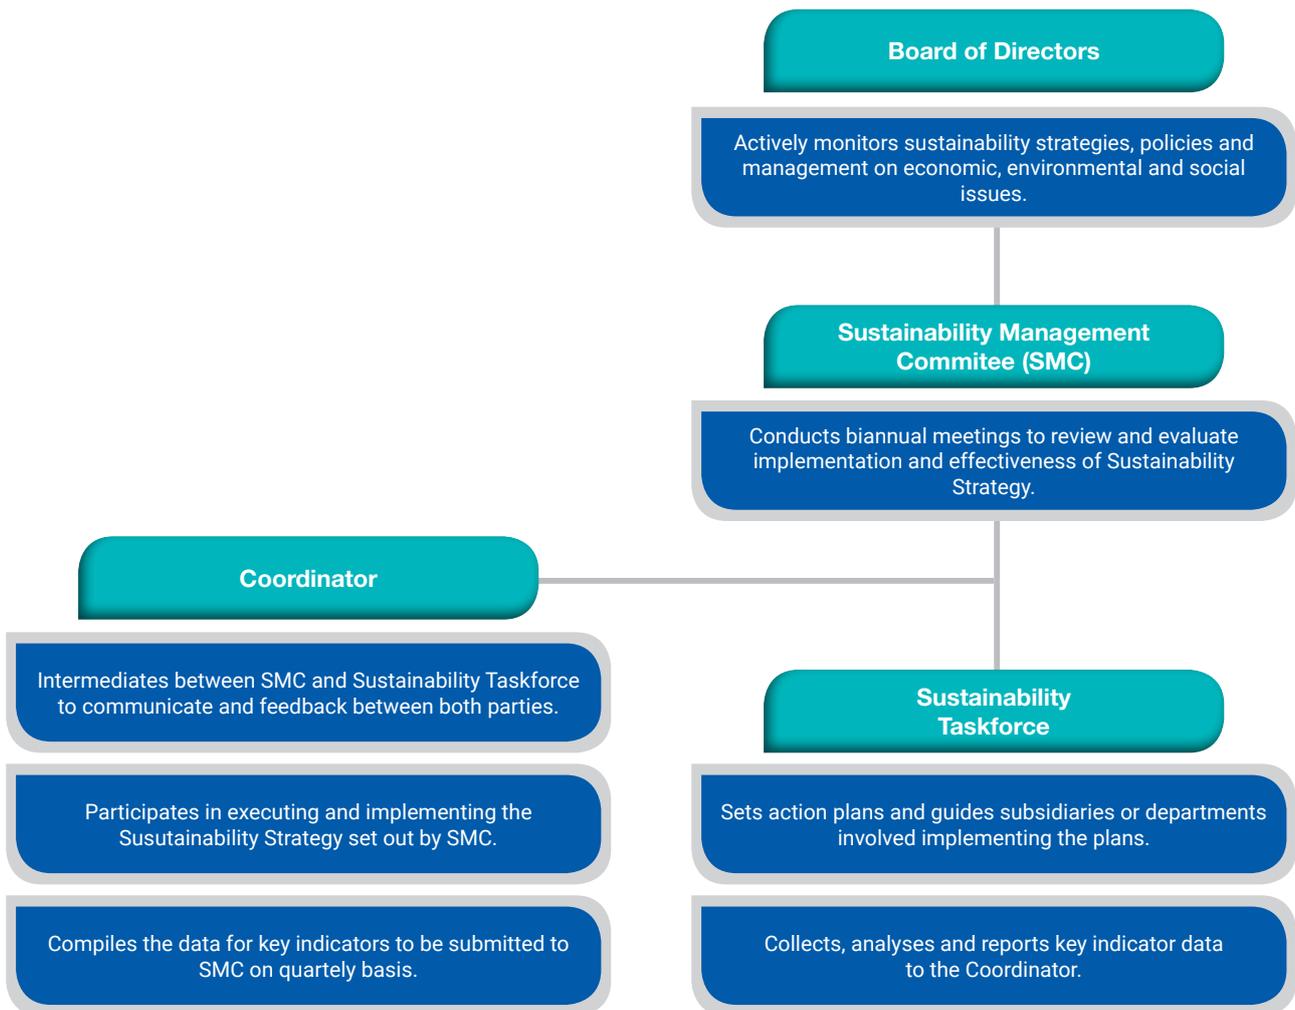

Reporting Approach

This Report is guided by Bursa Malaysia Securities Berhad’s Main Market Listing Requirements on Sustainability Statement in Annual Reports. Material issues regarding Environmental, Social and Governance (ESG) aspects from Bursa Malaysia’s Sustainability Reporting Guide and Sustainability Toolkits were referenced. This Statement is also in line with global sustainability agendas and UN SDGs.

Sustainability Governance

The Board of Directors (Board) holds the ultimate responsibility and accountability for embedding sustainability into Pantech Group’s strategic direction and daily operations. The Board is supported by a robust Sustainability Governance structure that ensures long-term shareholder value creation and safeguarding of stakeholder interests.

The Sustainability Management Committee monitors, evaluates, develops and implements strategies, ensuring the inclusion of sustainability considerations. Our sustainability culture and values are driven by top management and cascaded down to all employees across Pantech Group. We remain committed to positively affecting the economy, environment, and people through continuous improvement.

Sustainability Statement (cont'd)

Materiality Assessment

Materiality Assessment Process

Materiality assessments are conducted annually and is central to aligning Pantech Group's strategies, performance management and reporting. It ensures our sustainability strategy addresses stakeholders' evolving concerns including economic, environmental, social and governance matters that significantly influence our ability to create value.

We referred to Bursa Malaysia's Sustainability Reporting Guide and Toolkits, UN SDGs, and relevant industry-specific references and publications to update material sustainability matters significant to Pantech Group's business operations which can be a major influence on stakeholders' decisions.

Scope of Reporting

The Sustainability Report covers the financial period 1 March 2021 to 28 February 2022, and for Pantech Group subsidiaries mentioned below, unless otherwise stated.

The basis of reporting covers subsidiaries which:

1. Have business operations within Malaysia.
2. Have significant revenue contribution or impact to Pantech Group.

The subsidiaries which fall under this scope are:

- Pantech Corporation Sdn. Bhd.
- Pantech (Kuantan) Sdn. Bhd.
- Pantech Stainless & Alloy Industries Sdn. Bhd.
- Pantech Steel Industries Sdn. Bhd.
- Pantech Galvanising Sdn. Bhd.

For this year's report, indicators disclosed include some with baseline comparison data.

Stakeholder Engagement

Pantech Group is accountable to stakeholders. We strive to provide transparent disclosures regarding our decision-making processes to achieve long-term value creation. Emphasis is placed on stakeholder engagement to develop strategies that harmonise with stakeholders' interests and expectations. Pantech Group conducts engagements with stakeholders through various channels to address their concerns.

Materiality Matrix

The following chart illustrates our material matters in FY2022 and depicts importance of each material matter based on its influence on stakeholder assessments and decisions.

Sustainable Business Growth

Economic Business Growth

Pantech Group is mindful of the knock-on impact we have on society. We understand our activities are an important source of income for local communities and provide a source of revenue for the nation via our taxes. We have continuously generated economic value which is appropriately distributed to stakeholders and retained to fuel growth.

As a key part of the supply chain and with entities in various strategic geographic locations, we create job opportunities for various communities contributing towards socio-economic development.

In addition to our impact on communities, we are conscious of the risks and opportunities brought about by climate change and the potential changes it can bring to our operations, revenue and expenditure. The impact of emissions, energy and water have been mapped accordingly in the materiality matrix on page 23. Methods to manage the risks and opportunities are discussed in the Environmental section on pages 25-27.

The Management Discussion and Analysis on pages 12-18 disclose the challenges and opportunities in the context of our operating environment. Information regarding the economic value generated, distributed, and retained in terms of revenue, operating costs, employee wages and benefits, tax expenses, dividend paid, and unappropriated profits can be found in the audited financial statements on pages 55-168.

Quality Assurance and Professional Certification

Pantech Group’s pipes, valves, fittings, flanges, and other products meet strict global and industry standards catering to a global customer base.

We curate an extensive, systematic, robust and up-to-date, dedicated document archive. If required, certificates are used to trace individual components and to validate requirements by customers or authorities.

Pantech Group holds certifications from various bodies providing quality assurance to our customers worldwide. We are wholly committed to delivering quality and customer satisfaction.

Sustainability Statement (cont'd)

Procurement Practices

Compliance with regulations and standards are embedded throughout all processes in Pantech Group. Vendors undergo a selection process which includes a thorough vetting and review. Suppliers are considered based on the quality of materials, reliability, lead time, cost, and ISO certifications.

Pantech Group maintains many stable and beneficial long-term relationships with our major suppliers by cultivating an open communication channel and fostering mutual respect. Some of the Group's suppliers have business relationships with us for over a decade. Nevertheless, the Group is diligent to ensure procurement is conducted responsibly, with integrity and through ethical transactions.

Employees are trained to maintain the highest standards when handling materials. Rigorous Quality Control (QC) checks are conducted throughout the manufacturing process to verify that quality of goods meet requirements. Identified deviations are separated and disposed of responsibly as scrap metal through a qualified provider.

Environmental

Energy

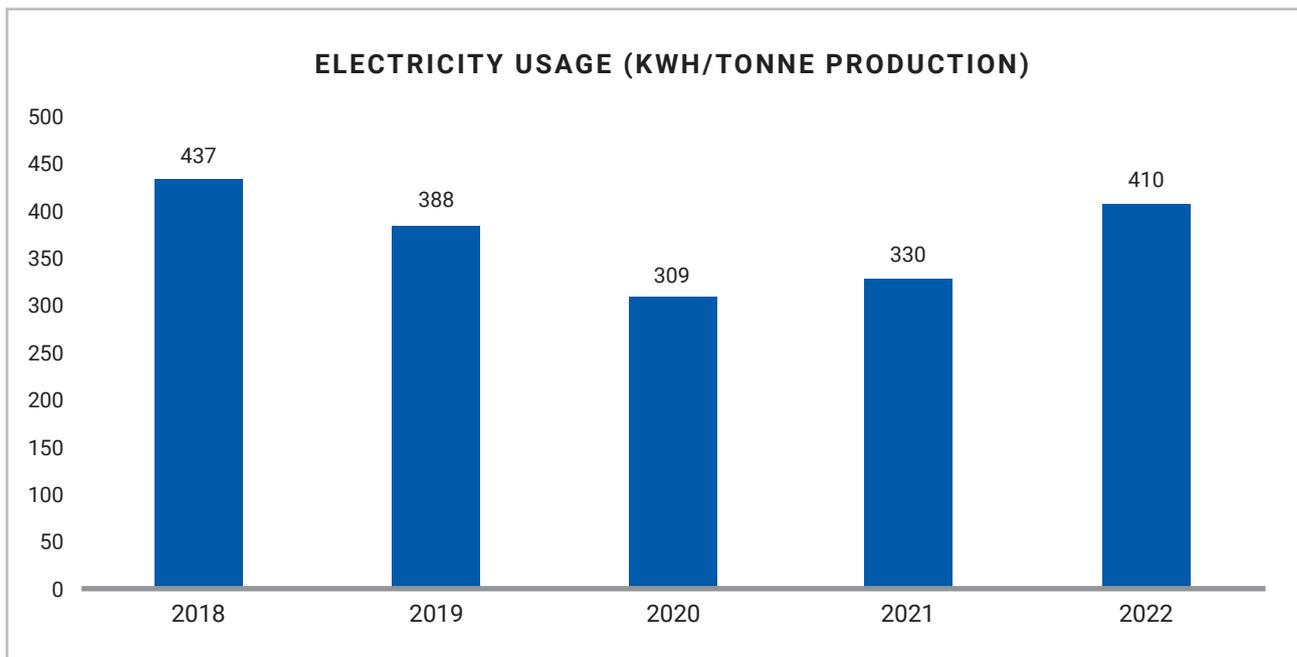

In our aspiration to be an international leader in the provision of total solutions for gas and fluid transmission system, Pantech Group consumes energy in our manufacturing and trading operations.

Use of energy efficient machinery enables better output with reduced energy consumption and potential wastage. We have put in place several measures to limit consumption of energy in our operations including:

- Energy-efficient practices to reduce energy usage when operation areas are not utilised.
- Translucent roofing in warehouses to capitalise on Malaysia's abundance of sunlight, negating the need for extensive lighting during bright sunny days.
- Daily monitoring system highlighting any surge of electricity to the Head of Production and Management team for verification, investigation and further action.

For this reporting period, electricity usage (kWh/tonne production) of the manufacturing division increased by of 24.24% in FY2022. This is attributable to the operational disruption caused by various Movement Control Orders (MCOs) where machines were operating as required but lack of manpower led to reduced utilisation. Additional production shifts to meet the recovery in demand led to higher energy use.

As part of our green initiatives, we will install a 1,469.32kWp grid connected photovoltaic system at Pantech Steel Industries Sdn. Bhd. (PSI). The installation is estimated to be completed in FY2023. Upon commissioning, this will reduce our reliance on grid electricity and avoid the production of up to 1,362 tonnes of CO₂ annually.

* Data from Manufacturing Division

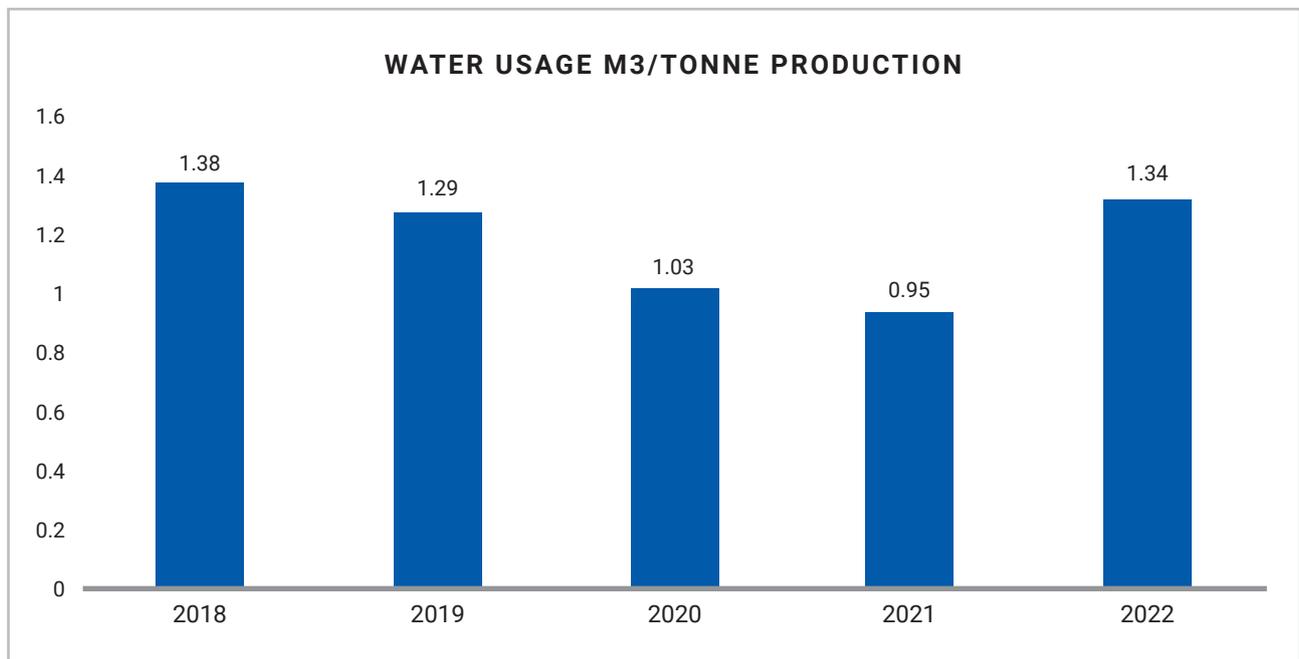

Sustainability Statement (cont'd)

Water

Pantech Group is cognisant of the importance of clean water sources for societal consumption. We monitor and implement measures to reduce our water usage that could contribute towards water scarcity. Pantech Galvanising Sdn. Bhd. (PGSB) and Pantech Stainless & Alloy Industries Sdn. Bhd. (PSA) employ rain harvesting which comprise collection, filtration, and storage systems.

Seven rainwater catchment tanks are installed across PGSB and PSA that have a total capacity of 70,000 gallons. At PGSB, we have also completed the construction of an additional rain harvesting system which can store 790 gallons of water, accommodating requirements of the 2-acre land expansion undertaken in FY2021.

FY2022 saw the water usage (m³/tonne production) increasing by 41.05%. Similar to electricity usage, the increase was due to greater demand for our products. Increased manufacturing activities required a higher water usage.

* Data from Manufacturing Division

Effluents, Waste and Emissions

PGSB and PSA have Industrial Effluent Treatment Systems to ensure proper disposal of wastewater arising from manufacturing processes. This includes wastewater and sludge treatment facilities that can treat and neutralise up to 240 cubic metres of acid water from pickling tanks daily.

Licensed vendors are engaged for the proper handling and onward processing of sludge, in accordance with required regulations.

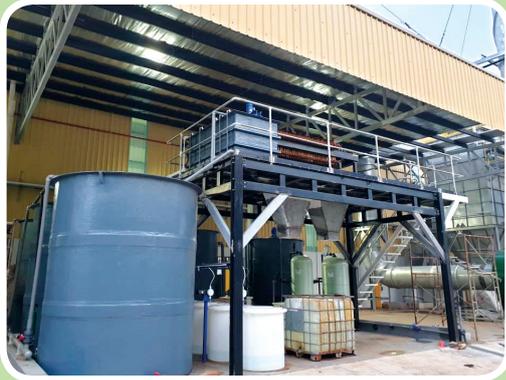

Pantech Group also implements scrubber systems to neutralise and filter acidic fumes from the pickling process. Dust collector systems complement the scrubber systems by filtering air and preventing dust particles from being released.

The Group continuously monitors the need for additional waste management systems. For FY2022, the Industrial Effluent Treatment System, air scrubber system, and dust collector system installed at PGSB's facility in FY2021 have contributed positively towards the Group's waste management initiatives.

Sustainability Statement (cont'd)

The details of these machineries are as follows:

INDUSTRIAL EFFLUENT TREATMENT SYSTEM

- Process up to 20 cubic metres of wastewater per day

AIR SCRUBBER SYSTEM

- Capacity of 4,200 cubic feet per minute or 120 cubic metres per minute

DUST COLLECTOR

- Capacity of 30,000 cubic feet per minute or 50,000 cubic metres per hour

PSA undertook rectification measures after inspections by the Department of Environment (DOE) and Majlis Perbandaran Pasir Gudang (MBPG) showed non-compliance. In compliance with *Peraturan Kualiti Alam Sekitar (Efluen Perindustrian) 2009* and *Peraturan Kualiti Alam Sekitar (Buangan Berjadual) 2005*, the following were performed during FY2022:

- Upgraded the Industrial Effluent Treatment System by replacing the flexible pipe with fixed pipes and installing additional sensors in effluent tanks to detect pH readings.
- Enhanced the disposal process of scheduled waste where disposal items are stored properly, labelled with specifications and recorded accordingly.
- Strengthened the walls of underground acid tank to prevent acid leaking.
- Engaged contractor to clean drainage system.

PSA has taken actions immediately to rectify all issues highlighted by DOE and MBPG. Subsequently formal reports were submitted to the authorities and compound paid. PSA also took additional initiatives by conducting extra trainings and site audits to increase awareness and avoid recurrences of incidents.

The effluent, waste and emission management implemented is supported by a monitoring system that meets the requirements set out by the Department of Environment. This includes:

- Daily testing of the water discharged;
- Testing of water discharged conducted by a third-party laboratory on a weekly basis;
- Testing of effluent or sewage by a third-party laboratory on a weekly and monthly basis;
- Daily performance monitoring of air scrubbers; and
- Annual inspection of air scrubber conducted by a third-party vendor

The results of the monitoring system are recorded and reported to the management on a timely basis ensuring proper action is taken if there are any abnormalities.

Sustainability Statement (cont'd)

Employment Practices

A competent, motivated and performance driven workforce is key to achieving business objectives. Understanding this, Pantech Group is focused on attracting, nurturing, developing and retaining top talents. This is done via three core themes:

1. Employee Development
2. Employee Wellness
3. Diversity and Equal Opportunities

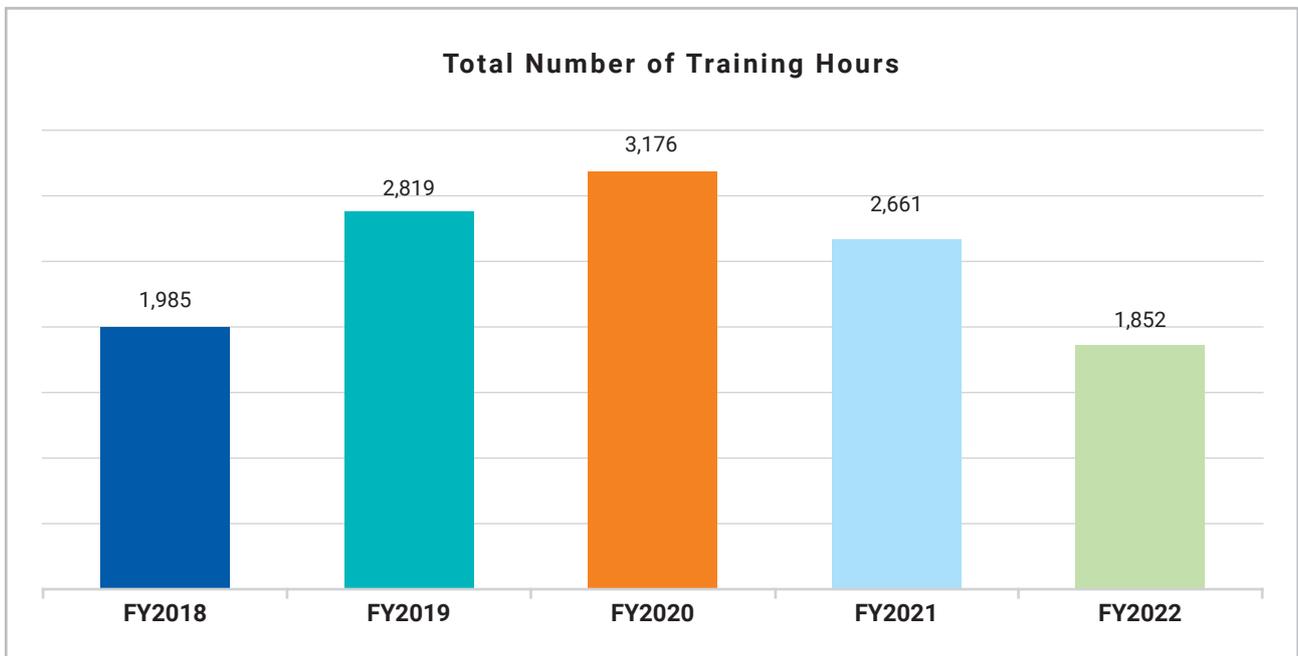

Employee Development

The Group is committed to equipping staff with knowledge, skills and capabilities that allow them to reach their full potential. Training sessions covering topics such as safety, information technology (IT), anti-bribery and corruption and sustainability were held in FY2022.

Additionally, we also organised trainings in areas such as finance, product technical knowledge, human resource, environmental, waste management and investor relations. Our goal is to deepen Pantech Group's pool of talent, enhance their skillset and enable them to remain relevant in an evolving operating landscape.

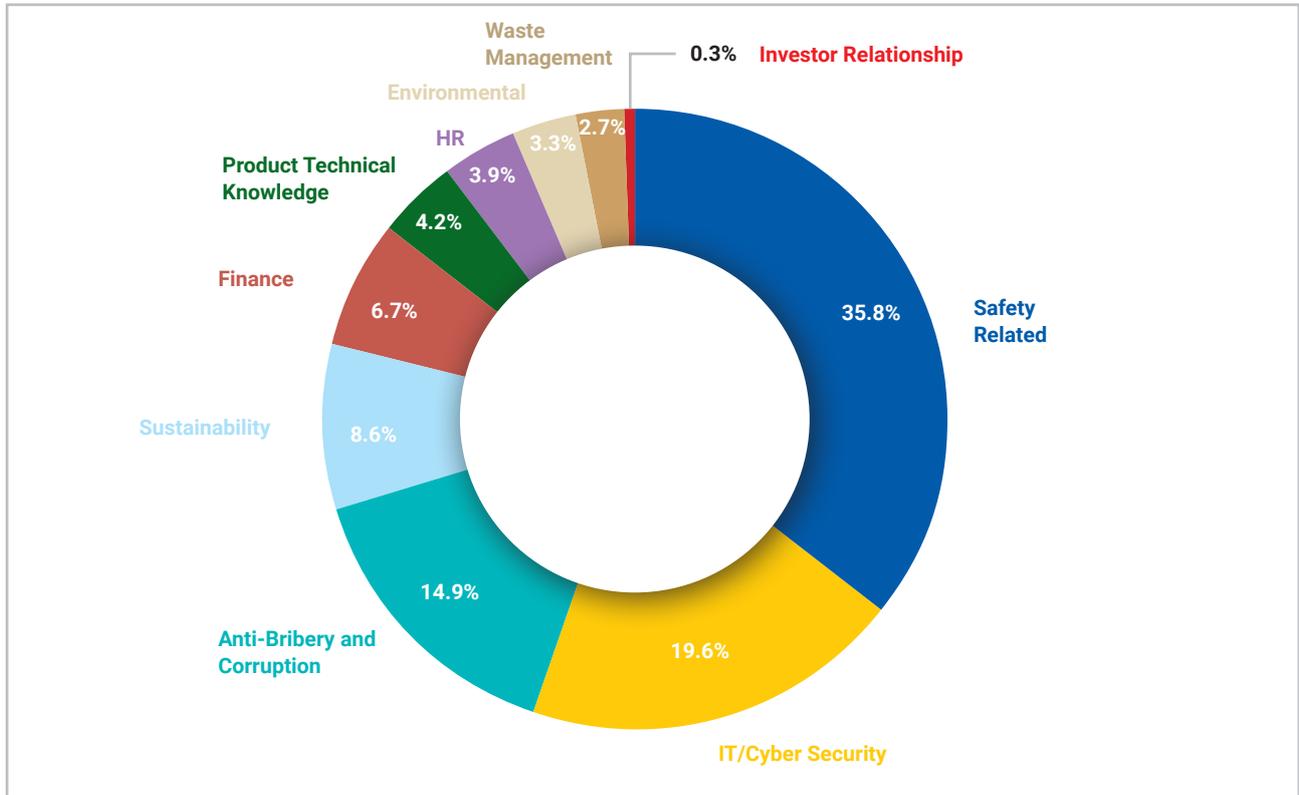

A heavy emphasis is placed on health, safety, and environment (HSE) and personal protective equipment (PPE) trainings to reinforce a culture of safety within our workforce. These sessions develop employees' ability to identify potential hazards and the subsequent remedial actions to perform. At the same time, it refreshes and updates existing knowledge and skills.

The trainings held during FY2022 covered topics including Cyber Security Awareness, Chemical Handling, Working Safety at Height, Environmental Aspect and Impact Awareness, Noise Exposure, Sustainability Accelerator, Safe Forklift and Stacker Handling, Scheduled Waste Management, Hazards at Workplace and Fire Safety.

Sustainability Statement (cont'd)

Breakdown of Training Hours

Employee Wellness

Operational Safety and Health (OSH)

Our comprehensive approach to workplace wellness takes into consideration elements to minimise physical harm and promote employees' health. We continuously monitor the working environment surrounding our employees to identify and mitigate potential risk of unwanted incidences.

To ensure the continued safety of staff, all safety procedures are reviewed and updated periodically. Pantech Group's culture of safety is encapsulated in our CARE Policy.

Comply and exceed where practicable, with the relevant legal and other requirements

Aim to be an organization free from pollution, accident and ill health

Redesign our work activities and storage area to reduce adverse impacts and risks

Enhance our system performance continually by setting new objectives and targets periodically

Sustainability Statement (cont'd)

Operational Safety and Health (OSH) (cont'd)

HSE and PPE trainings are important aspects in the effort to mitigate and reduce the risk of accidents. Knowledge and skills are cultivated and honed during these trainings, which involved hands-on practical sessions to internalise safety culture within our workforce.

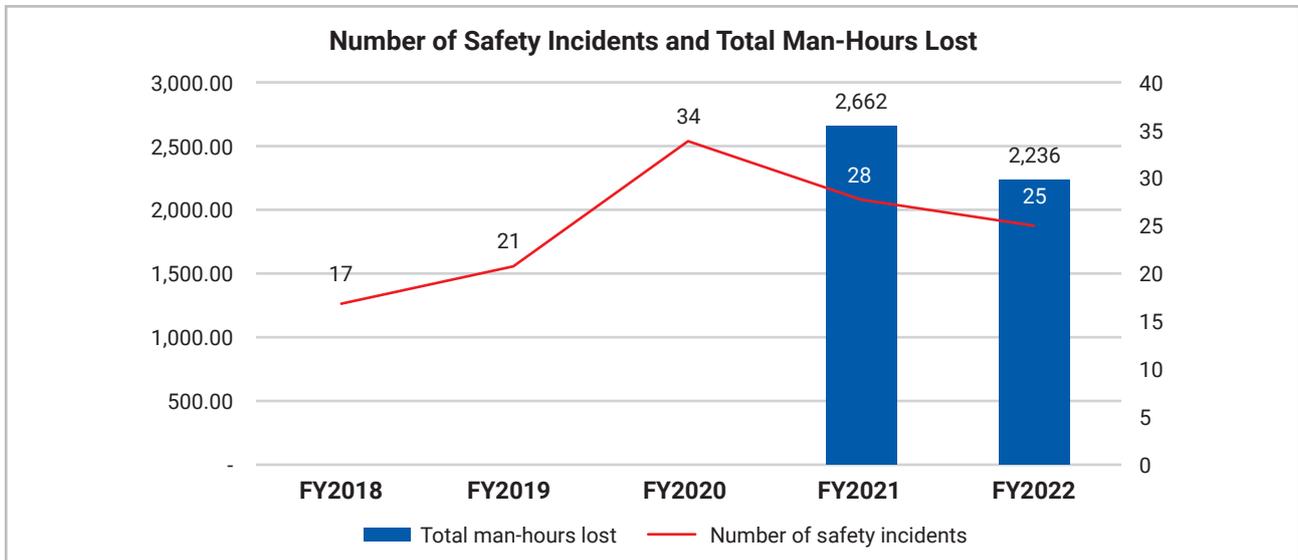

Pantech Group managers or HSE officers lead by example, conducting weekly 15-minute Toolbox Sessions with employees from the Production and Warehouse department. These sessions highlight safety issues and act as a reminder for employees to abide by safety guidelines.

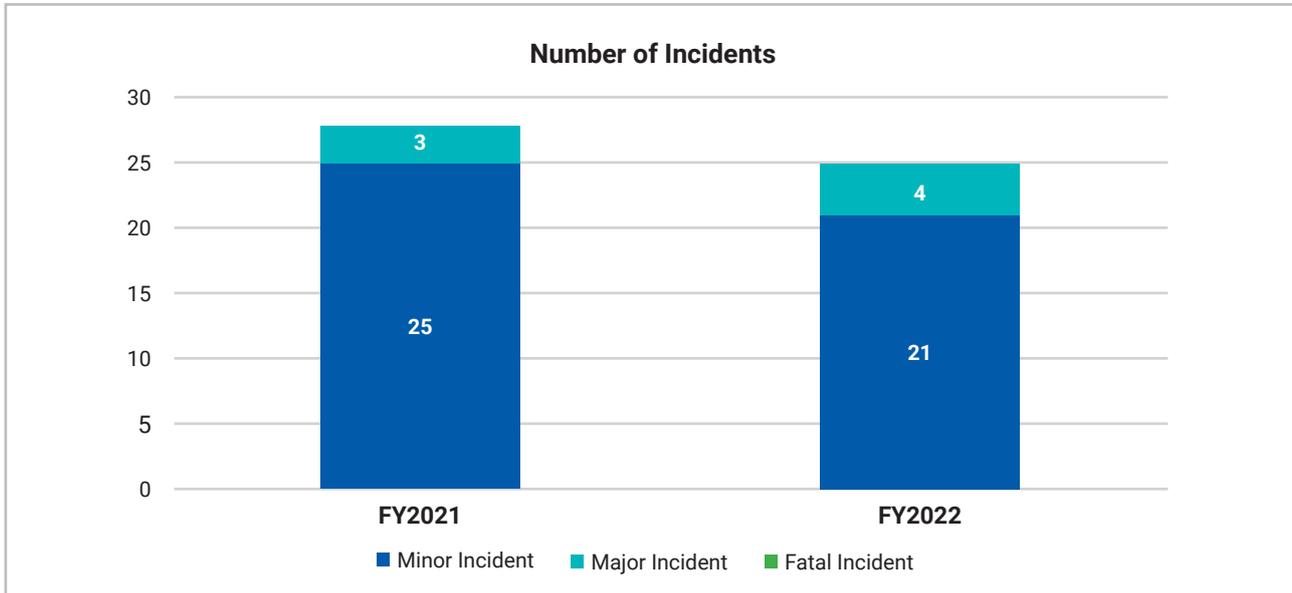

As a highlight and further emphasis on HSE, the Group held the 'Pantech OSH Day' themed, "Anticipate, Prepare and Respond to Crisis: Invest Now in Resilient OSH Systems" in conjunction with World OSH Day. The one-day event complemented the initiatives and served as a platform to acknowledge and recognise employees who have exhibited outstanding OSH practices. Overall, the Pantech OSH Day was a day to remind and promote prevention of safety incidents at the workplace.

Safety related training sessions are conducted regularly and have contributed to the decline of safety incidents in FY2022. There were 25 incidents recorded in FY2022 (21 minor incidents & 4 major incidents) as compared to 28 incidents recorded in FY2021. No incident resulted in fatal injuries. Overall, this led to a 16% decrease in total man-hours lost from 2,662 hours to 2,236 hours.

All safety incidents were investigated and subsequently, precautionary and remedial actions will be implemented whenever necessary to mitigate the risk of the incident reoccurring. Pantech Group continuously assesses the risks of safety incidents in our operations. We are dedicated in maintaining a safe and conducive workplace with zero safety incidents.

Sustainability Statement (cont'd)

Type of Incidents	Description
Fatal	<ul style="list-style-type: none"> Incidents that result in death
Major	<ul style="list-style-type: none"> Incidents that result in non-fatal injury but cause permanent disability Prolonged but non-permanent disability with absence from work or on medical leave (MC) of more than 3 weeks
Minor	<ul style="list-style-type: none"> Incidents that result in minor injuries but not permanent disability Not critical or life threatening, minor abrasions, bruises, cuts and first aid type injury Absence from work or MC of less than 3 weeks

As COVID-19 continued to be an ongoing concern, the COVID-19 Mitigation Procedures remain in place to reduce the risk of infection and minimise health risks to employees. It has been updated to reflect latest guidelines provided by the government.

Headed by the Chairman with representation from Production, Warehouse, Quality Control and Human Resource, the COVID-19 Action Group ensured procedures set are up to date to protect employees. HODs and HSE officers in turn drive the operational implementation of procedures by every Pantech Group employee.

The COVID-19 Mitigation Procedures includes initiatives such as:

1. Availability of hand sanitisers at various locations
2. Daily distribution and proper disposal of face masks
3. Installation and operation of disinfection fogging sanitiser chambers at every entrance of Pantech Group's premises
4. Centralised delivery centres to minimise contact with external parties
5. Body temperature screening of employees and visitors upon entering premises in accordance with government SOPs
6. Scanning of MySejahtera and declaration of health status during registration in accordance with government SOPs
7. Communication and education of the hazards and spread of COVID-19 at the workplace
8. Distribution of self-test kits by HSE officers when required
9. Investigation and mitigation of suspected COVID-19 cases

Sustainability Statement (cont'd)

Diversity

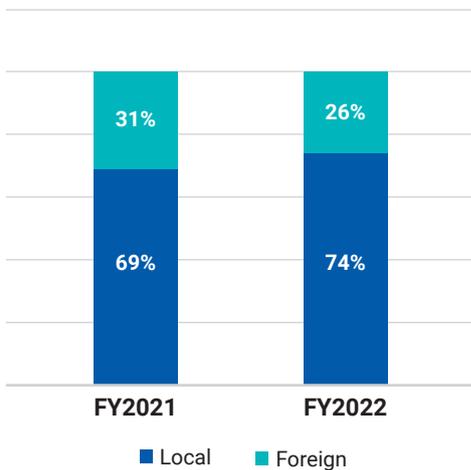

Pantech Group practises meritocracy in the recruitment, remuneration, rewards and career development opportunities of employees. The Group embraces inclusivity and diversity and treats all our employees with respect; any form of discrimination against age, race, gender, religion, family or marital status is censured.

Each business unit is represented by a diverse workforce with their own individual experience, knowledge and perspectives that are complementary. This creates a synergistic and inclusive workforce that adds value to our operations.

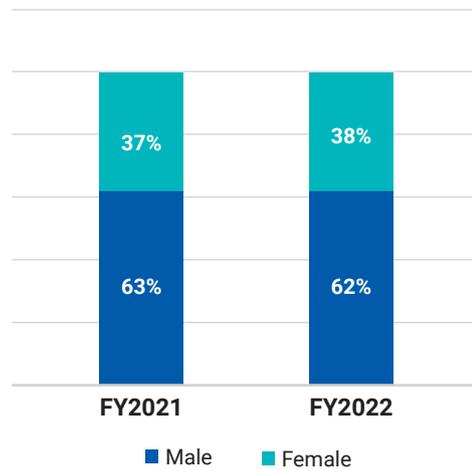

The majority of Pantech Group's local employees are below 40 years old (73%), reflecting the Group's dedication to providing opportunity and nurturing young talent while simultaneously ensuring business continuity. One third of the Board seats are held by female directors while 38% of our entire local workforce are female.

As a corporate citizen that is committed to creating value in the communities in which we operate, we create job opportunities for locals. As at the financial year end, 74% of our employees are local.

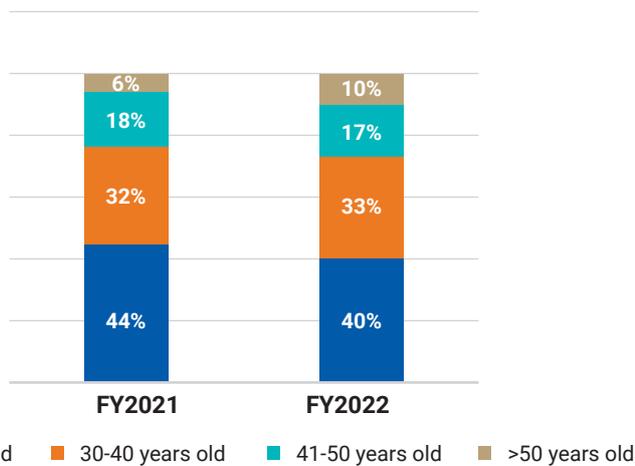

Breakdown of Staff

Local Employees by Gender

Local Employees by Age Group

Pantech Group acknowledges the importance of loyalty amongst our workforce as it is imperative to the achievement of our business objectives. Employees who have worked at Pantech Group for 5 years, 10 years, 15 years, 20 years and 25 years receive long service awards and cash-in-kind awards.

Sustainability Statement (cont'd)

Anti-Corruption and Bribery

Pantech Group conducts business with integrity and adopts a zero-tolerance stance towards any forms of bribery, fraud and corruption.

Our Code of Ethics directs our dealings mitigating the risk of bribery and corruption risks in all our dealings. This is complemented by the Anti-Corruption and Bribery policy which is regularly communicated to both internal and external stakeholders.

A Whistle Blowing policy is in force for staff to safely report any misconduct to senior management without fear of repercussions. Misconduct in any form is deliberated through an internal inquiry and subsequently, if guilty, will prompt serious action.

In this respect, Pantech Group is pleased to announce that there were no corruption or bribery incidences during FY2022.

Community

Pantech Group's ability to create long-term value is built on being a desired member of the communities we operate in. We are cognisant of our economic, social, and environmental impact on the areas in which we operate, either directly or indirectly. Pantech Group make efforts to understand the unique needs of the community and are committed to creating beneficial partnerships.

Continuing our long-standing advocacy for education, Pantech Group lent a helping hand to our employees who have school-going children. The annual Back to School Programme subsidises employees' school expenses for their children in both primary and secondary school.

Sustainability Statement (cont'd)

Community Initiatives

- Supported Persatuan Tindakan Sosial Selangor with the donation of a 14-seater van for the purpose of assisting those in need.
- Helped sustain the good works of National Stroke Association of Malaysia (NASAM) in providing affordable rehabilitation services to stroke survivors.
- Lent a helping hand in the provision of basic food necessities to the underprivileged impacted by the pandemic through Soroptimist International Club Iskandar Puteri.
- Encouraged and enabled underprivileged students to continue pursuing education via the provision of 18 notebooks and desktops via Tzu Chi Foundation.
- Facilitated the process of B40 individuals to develop a sustainable source of income in collaboration with Community Transformation Initiative Berhad (CTIB), helping them to learn and provide sewing services. The seven sewing machines purchased for the programme enabled the individuals to produce (cloth) face masks. At the same time, 3-ply face masks were distributed to 216 persons from the B40 group.
- Donated RM20,000.00 to Yayasan Sin Chew in aid of a Stage 4 Lung Cancer patient.
